The Pennsylvania State University

B.S. in Computational Data Science, Minor: Finance | GPA: 3.8 / 4.0

Graduation Date: December 2027

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Financial Analytics & Modeling, Probability & Statistics

Organization: Nittany AI Alliance, Nittany Data Labs, Engineering Lead Society, Consulting Training Program, THON

WORK EXPERIENCE

Penn State University | Dept. of Information Sciences & Biochemistry

Undergraduate Student Researcher | Python, LLM, NLP, PubMed API, PostgreSQL

Feb 2026 - Present

- Build an LLM-based pipeline to extract and classify database accessions from biomedical manuscripts via the PubMed API
- Design NLP-based linkage logic between ReDU and NCBI SRA, cutting manual curation effort for multi-omics research
- Resolve inconsistent sample identifiers across manuscripts and databases to enable reliable cross-database matching

Nittany Data Labs

Data Analytics Project Lead | Python, SQL, Pandas, NumPy, EDA, Jupyter

Sept 2025 - Present

- Translate 20,000+ financial records into actionable data problems using SQL to surface spending trends and risk indicators
- Execute EDA & anomaly detection with Pandas and NumPy, identifying behavioral patterns and anomalies for financial decisions
- Synthesize findings into Jupyter-based executive summaries, improving reporting clarity and decision-making for leadership

Atlas Analytics

Data Science Analyst | PyTorch, Python, SQL, Pandas, Power BI

Jan 2026 – Mar 2026

- Engineered transformer-based time series models in PyTorch, improving multi-horizon demand forecast accuracy by 10%
- Profiled and refactored the PyTorch inference pipeline, adding automated benchmarking that cut latency by 5%
- Built and deployed SQL-backed BI dashboards with scheduled data refreshes, removing 6 hours/week of manual reporting

Nimbus Analytics Labs

Operations Analytics Lead | Python, Scikit-learn, Pandas, NumPy

Aug 2025 - Dec 2025

- Built a Python data pipeline to process 10,000+ customer and financial records, surfacing behavioral and retention patterns
- Engineered a reusable feature-preprocessing module that cut dimensionality by 30% and reduced model training time by 35%
- Trained and deployed supervised ML classifiers to score churn risk and segment customers into behavioral cohorts

PROJECTS

Customer Risk Scoring Model

Aug 2025 - Dec 2025

Predictive Analytics | Python, Pandas, NumPy, EDA, Scikit-learn

- Developed supervised ML models (Logistic Regression, Random Forest) to score churn probability from 10,000+ records
- Reduced feature space ~30% via correlation analysis and EDA; validated performance using ROC-AUC

Stock Analyzer Application

Oct 2025 - Jan 2026

Financial Systems | Java, SQL, Apache Derby, OOP, JDBC, DAO Architecture

- Architected a full-stack Java application tracking income, expenses; 10+ budgeting categories with automated financial reporting
- Designed efficient relational schemas and DAO architecture supporting 1,000+ transactions with automated monthly summaries

Course Scheduling & Enrollment System

Jan 2025 - May 2025

Application | PostgreSQL, Database Design, Apache Derby, SQL

- Engineered a database-driven enrollment system with waitlist management and administrative workflows using transactional SQL
- Implemented enrollments caps, automated waitlist promotion, and role-based access control to ensure system integrity

LEADERSHIP

Penn State THON | DEI Chair – Donor Alumni Relations Committee

Aug 2025 - Feb 2026

- Implemented the 2025-2026 DEI Action Plan across 5+ committees, expanding diverse representation in THON leadership
- Audited 15+ events, including the 46-hour dance marathon, for ADA accessibility; designing DEI training for 700+ volunteers

TECHNICAL SKILLS

Languages: Python, SQL, Java, R, HTML/CSS, JavaScript, Bash

Frameworks: Pandas, NumPy, Scikit-learn, PyTorch, Django, Flask, Streamlit, Node.js

Tools: Git, Docker, AWS, Excel, Jupyter, Power BI, PyTest, Apache Derby, PostgreSQL, PubMed API, JDBC

Professional Certifications: SAP Certified – SAP Generative AI Developer certification
